about us.

It all started in 1985 when Mr. Aysan took over the metal working shop from his father. With the experience he gained on metal processing, Mr. Aysan started to manufacture his first furniture models in 1989. In 1991, he was requested his first bulk order for one of his chair models. With the experience and vision gained, B&T Design was established in 1995.

B&T Design started to grow rapidly right after its establishment. In accordance with its sense of quality and design, it started to work with the best designers in search of the perfection and the better as of 2001. It designed extraordinary furniture models in a short time.

The collection started to be exported to all over the world. From the United States to Australia, exporting to more than 30 countries, B&T Design made up 10% of Turkish metal furniture export in 2005.

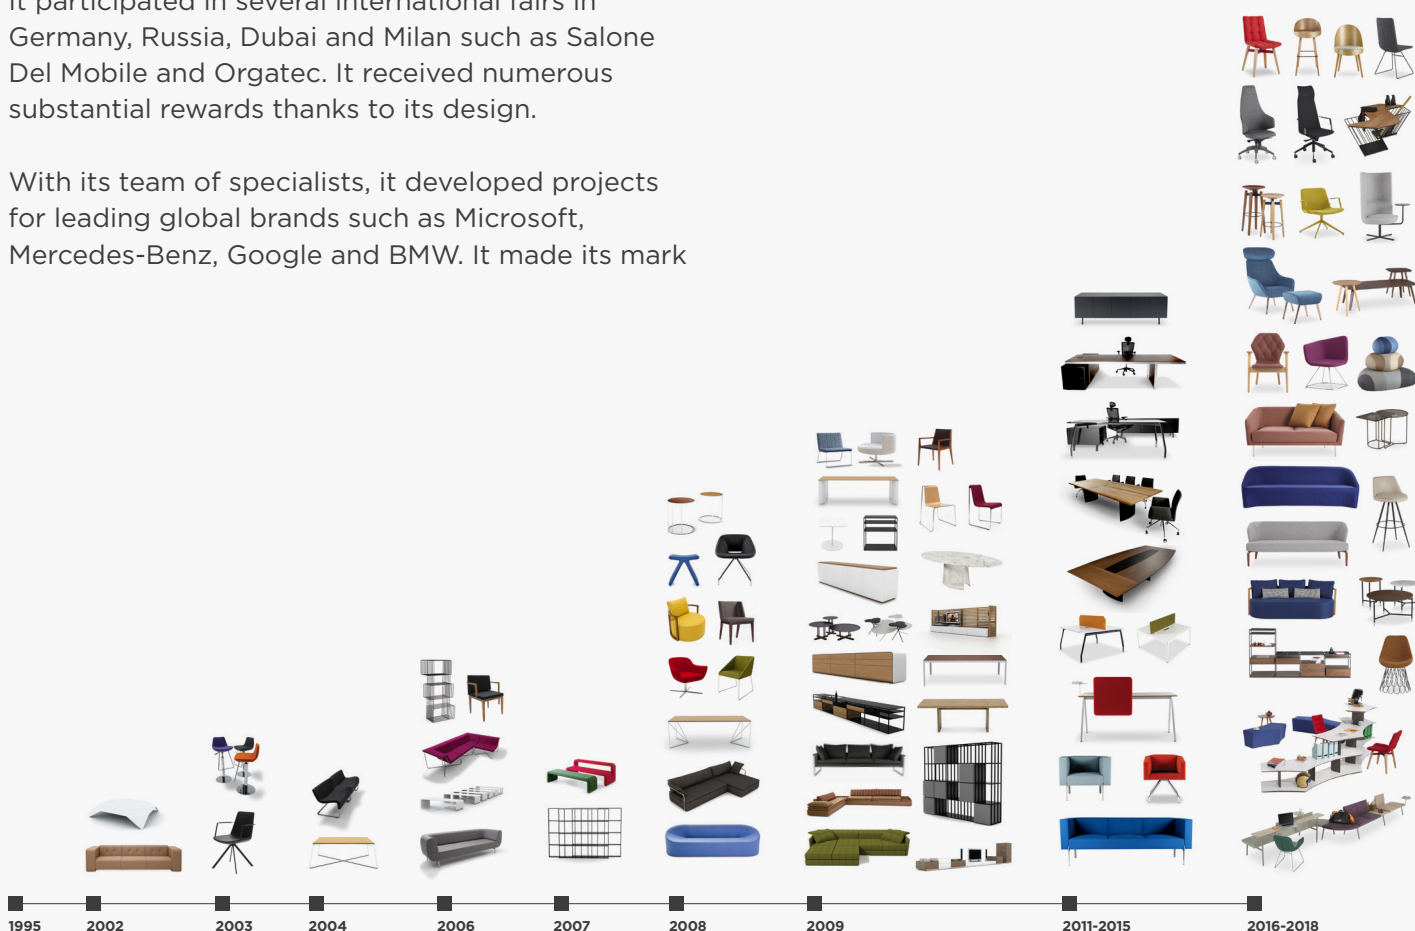

It participated in several international fairs in Germany, Russia, Dubai and Milan such as Salone Del Mobile and Orgatec. It received numerous substantial rewards thanks to its design.

With its team of specialists, it developed projects for leading global brands such as Microsoft, Mercedes-Benz, Google and BMW. It made its mark

on large-scale projects of hotels, hospitals, offices and housing that it carried out by supporting architects and interior architects with its products highlighting the simplicity in design and with its speciality in design management. Since 2009, it has extended its range of products by incorporating domestic furniture and started to provide service in the field of retailing as well.

It has maintained its investment in communication and advertising materials. In order to interact with people from all over the world, it began to put importance to online communication in 2010. Its latest store was opened in Ankara in 2015.

Achieving important successes at home and abroad, B&T Design expanded its production capacity by moving into its new factory in 2016.

product timeline.

vision.

The initial and never changing mission of B&T Design has always been creating timeless designs. Inventive in both design and production processes, the firm has maintained a high quality and longevity in its products. The unique and basic designs of B&T Design have turned the brand into an important figure globally. The company philosophy is distinction through simplicity.

The long-term goal is to create the design of the future. The only way to achieve this is to keeping up with the newest technology and B&T Design has adapted the way of thinking in order to work create the necessary infrastructure for future.

company structure.

Talip Aysan is the founder and the sole owner of the company.

B&T Design consists of 62 blue-collar employees and 22 white-collar employees.

product groups.

B&T Design produces upholstered chairs, sofas, armchairs, stools, pouffes, coffee tables and tables. The company is focused upholstered furniture, mainly for projects.

B&T Design products feature smooth shapes, high-quality coverings, ergonomics and elegant designs. The products, upholstered with expanded polyurethane, are made through the innovative injection molding technique which offers a number of advantages in terms of production and aesthetics: excellent coverings, smooth shapes, resistant and reliable foam rubber, together with a high level of ergonomic quality.

The plus factor of B&T is the excellent quality of finishes and the wide range of products.

export.

B&T Design has adapted a global identity both in its culture and in its function. Export revenue is 80% of B&T Design's revenue. The quality of customer satisfaction and the flexibility that is offered enables the company increases the number of customers and the number of countries that B&T Design exports to. In 2015, the company had been exporting to 30 different countries around the world, and as of 2018, this number has increased to 52 and has been growing exponentially.

production.

B&T Design factory is a vital part of the company. With over 30 years of production experience in production of high-quality movable furniture, the factory has been keeping up with the latest technologies in order to maximize efficiency as well as satisfying the continuous change in customer needs.
